

EDUCATION

Camosun College
Interactive Media Development (IMD) Program

Jan 2023 – Present

Two-year, double-credentialed program covering UX/UI design, network software design and administration, and object-oriented programming. Equips graduates to work globally in virtually any facet of the tech industry.

Concordia University
Political Science

Sept 2018 – May 2019

Continued to hone my writing and critical thinking through Concordia's highly regarded Political Science program.

Victoria High School
Diploma, Double Dogwood

Sept 2015 – June 2018

Developed an early interest in writing, both creative and formal, and built the skill set that won me a provincial writing award.

TECHNICAL SKILLS

- › Java, HTML5 & CSS3, Swift, C#
- › UX / UI Design
- › Network Software Design & Administration
- › Object-Oriented Programming
- › Rapid language acquisition & implementation

BRODYN VOLPE

Interactive Media Development Graduate | Web & Application Developer

179 Olive Street, Victoria, BC V8S 3H4 | (250) 884-6177 | volpebrody@gmail.com

PROFILE

Bilingual, tech-focused graduate of Camosun College's Interactive Media Development program with hands-on experience in application building, web development, UX/UI design, and object-oriented programming. My path here hasn't been a straight line — restaurants, landscaping, and construction sites taught me as much about staying calm under pressure and working with people as any classroom did. That mix of technical grounding and real-world grit is what I bring to a team.

WORK EXPERIENCE

Interactive Media Development Program — Various Projects
Camosun College, Victoria, BC

Sept 2023 – Present

Throughout the IMD program, I've regularly applied what I'm learning to real, hands-on work: building applications, developing for the web, testing and debugging, and collaborating in project groups where time management and clear communication make or break a deadline. It's been a steady progression from theory to practice, and every project has sharpened both my technical instincts and my ability to work well with a team.

Server
Bard and Banker, Victoria, BC

Sept 2021 – Sept 2023

This was some of the most valuable experience I've had. A sharp mind, fast-paced decision-making, and a superb ability to triage problems and multitask were essential just to keep up — it's a high-turnover, genuinely demanding industry, and it pushed me to think on my feet night after night. I came out of it a sharper, more resilient candidate for it.

Sales, Forklift Operator, Driver
GardenWorks, Victoria, BC

March 2017 – Present

Being a useful asset in this business has always demanded on-the-fly learning, real knowledgeability about the product, and detail-oriented communication to properly service guests. Alongside sales, I was trusted with outgoing deliveries and forklift operation — responsibilities that taught me to balance customer-facing work with equipment-handling precision.

CORE STRENGTHS

- › Bilingual — fluent in French (13 years)
- › Analytical problem-solving
- › Strong written & verbal communication
- › Cross-functional team collaboration

CERTIFICATES

- › FOODSAFE Level 1
- › First Aid
- › Pesticide Dispenser Certificate
- › Serving It Right

AWARDS

- › District Authority Award in Fine Arts, 2018 — Creative Writing

VOLUNTEER WORK

Big Brothers Big Sisters Victoria
Volunteer Mentor

INTERESTS

- › Fitness — weightlifting, boxing
- › Music — playing guitar
- › Vehicle maintenance
- › Outdoors — fishing, hunting, anything in the woods or on the water

WORK EXPERIENCE, CONTINUED

Server, Bartender

Sept 2020 – Dec 2020

La Capilla Restaurant, Nelson, New Zealand

A small fine-dining treasure nestled amongst farmland in the New Zealand countryside. I admired the chef, Takeshi, who ran the kitchen essentially as a one-man army — which left me and a single other front-of-house colleague to serve, bartend, and host, all at once. The thrill and discipline of multitasking at that pace, in that setting, is something that's stayed with me ever since.

General Laborer, Excavator Operator

Jan 2019 – July 2019

Construction, Victoria, BC

A brief stint in trades gave me exactly the change of pace I was looking for at the time, and taught me invaluable lessons through gritty, demanding work. My project manager took the time to teach me the basics of heavy machinery operation on the bobcat and excavator — an opportunity I'll always be thankful for, and one that showed me how much I can pick up quickly when someone's willing to teach.

General Laborer, Excavator Operator

Sept 2020 – Jan 2020

Landscaping + Renovation, Nelson, New Zealand

Having grandparents who live in New Zealand has opened up some incredible opportunities, including the ongoing effort of helping maintain their expansive property. While living there, I regularly planned and carried out landscaping projects and small renovations for current tenants — from installing a retaining wall to re-leveling the foundation of a sagging rental unit. It was hands-on problem-solving from start to finish, and I loved every part of it.
